## EDUCATION

---

### University of California, Berkeley – Coding Bootcamp

San Francisco, CA

*Full Flex Web Development*

Graduation Date: December 2020

- Building front-end sites that feature responsive layouts and interactive components.
- Back-end with an emphasis on command-line programs and database management.

### Year Up

San Francisco, CA

*Quality Assurance*

Graduation Date: January 2020

- Year Up is an intensive technical training and career development program.
- Coursework in Web Development – HTML, CSS, Javascript, Python, SQL and Agile Methodologies.
- Professional Skills and Business Communication.

### Skyline Community College

San Bruno, CA

*Associate's Degree*

Graduation Date: May 2016

- Finished General Education and transferable courses to UC's and CSU's | Dean's Honor List.

## WORK EXPERIENCE

---

### PayPal

San Jose, CA

*Database Platform Intern*

August 2019 - January 2020

- Engaged with the daily operations of the Database DevOps team.
- Performed and worked with 10 to 15 Jira ticket requests daily from other teams to support data cloning, data movement, and execution of SQL scripts to database that contributed to a fast and efficient workflow.
- Maintained and improved operations of 40 to 50 Oracle Database servers every week by utilizing Linux commands and an effective time management that resulted to a high percentage of active servers to support team operations.

### Sears

San Bruno, CA

*Sales Associate*

June 2017 - March 2018

- Managed to interact and assist 6 to 10 customers daily, tending to their questions and needs by providing quality customer service and knowledge about the product that resulted for maintaining weekly sales expectations.
- Collaborated with 2 managers every week and discussed ways on how we can improve our productivity. I showed strong work ethic and being an effective team player that resulted our department to be one of the best performing department.

## SPECIAL PROJECTS & VOLUNTEER EXPERIENCE

---

### Future Endeavors Project

- Collaborated with two other developers to create a website that serve as a check list for your travels. I used HTML and CSS for UI development and React for the functionality of the website. I utilized MongoDB to store the responses of our users. With hard-work and effective communication, we received an A+ grade as our final project.

### Snapshot Cleanup Project

- Connected with 300+ Database owners and advised them to clone their database with a new snapshot. I instructed the owners to raise a Jira ticket if they ran into any errors so I could help them complete a manual clone of their database. I finished the project by using Microsoft Excel for an organized information keeping, managing multiple terminals and active servers for manual clone, and paying close attention to detail to complete the project by the deadline.

### PayPal Connect Expo Volunteer

- The PayPal Connect Expo is a festival that brings together employees across PayPal and showcases all the innovations to create new experience for the customers. I was part of the team who managed and organized the event. With that experience I met a lot of amazing and smart people and was able to learn from their work and experience.
